

FITFILE is proud to be a sponsor of HLTH Europe Conference 2025

FITFILE, a fast-growing leader in secure health data access, privacy and linkage, today announced its strategic attendance and sponsorship of HLTH Europe 2025.

Taking place from 16th – 19th June 2025 at the RAI Amsterdam Convention Centre in the Netherlands, HLTH Europe brings together top healthcare leaders and policymakers and FITFILE is proud to be part of the conversation steering the future of connected, data-driven healthcare.

At the FITFILE stand and across the conference circuit, FITFILE representatives will be connecting with healthcare leaders, industry, technology and digital health partners to discuss critically important data needs and solutions as well as ways to drive innovative health solutions across Europe.

"HLTH Europe represents a pivotal gathering for the health innovation community, and we are thrilled to engage with leaders who share our vision," stated Philip Russmeyer, Founder & CEO of FITFILE. "At FITFILE, we believe that unlocking the true power of health data must go hand-in-hand with unwavering commitment to privacy and security. We look forward to demonstrating how our unique, GDPR-compliant solutions are enabling safer, more impactful research and care across Europe, contributing to the crucial conversations around ethical AI and scalable health technology."

About FITFILE: Through its globally unique, privacy-preserving technology, FITFILE provides the safest, most scalable at-source data record processing and multi-source linkage solution. Committed to GDPR-compliant privacy, security, and data protection by design and by default, FITFILE enables the highest efficiency, lowest risk, and fullest data value for Health Systems, Life Sciences, and Tech Partners, ensuring secure and impactful data utilisation.
